Restriction on the use of Hazardous Substances (RoHS)

At Tyco Electronics, we're ready to support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials. Part numbers in this catalog are identified as:

RoHS Compliant — Part numbers in this catalog are RoHS Compliant, unless marked otherwise. These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

NOTE: For purposes of this Catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories.

NOTE: Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change. For latest compliance status, refer to our website referenced at right.

Getting the Information You Need

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog
- Downloadable Technical Data Customer Information Presentation
- More detailed information regarding the definitions used above
- So whatever your questions when it comes to RoHS, we've got the answers at www.tycoelectronics.com/leadfree

The SOLARLOK Concept

System Features

Junction Box

- Variable wiring options
- Easily accessible
- Simple, fast and cost-effective assembly
- Flat, low profile design
- High current carrying capacity
- Good thermal balance
- Connectorized or direct wire configurations
- Up to four outputs possible
- Up to six internal rails
- Customer-specific solutions
- TÜV and UL approved
- UL File No. E226440

Connector

- Simple on-site processing
- Mating safety provided by keyed housings
- Semi-automatic assembly capability possible
- Multiple plugging and unplugging cycles
- Accommodates solar cable with different insulation diameters
- High current carrying capacity
- Wide temperature operating range
- TÜV and UL approved
- UL File No. E226440

Solar Cable

- Dual wall insulation
- Electron beam cross-linked
- Excellent resistance to U.V., water, ozone, fluids, salt, general weathering
- Excellent resistance to abrasion
- Halogen free, flame retardant, low toxicity
- Very low smoke emissions
- Excellent flexibility and stripping performance
- Different cable diameters
- Operating Temperature from -40 °C up to +110 °C
- Voltage Rating up to 2600 V DC
- IEC 60228 Class 5 (stranded tin plated copper and flexible)
- TÜV or UL certified

Simple and Reliable System Interconnection of Individual Solar Modules Right to the DC/AC Converters

Market expansion of the formerly regulated energy supply sector, increased global environmental awareness and governments committing themselves to more stringent environmental targets have opened up new opportunities for the photovoltaic industry.

Having served a niche market in the past, the photovoltaics industry now has the opportunity to move into mass production, realizing economies of scale and gaining a greater market share of the world's energy mix.

Tyco Electronics will be contributing to the establishment of this environmentally-friendly technology with the intro-

duction of its SOLARLOK connector system.

SOLARLOK delivers a flexible system solution for easy and reliable interconnections from photovoltaic modules to the DC/AC converter. The entire system concept is based on cost-effective and reliable processing of individual interconnection system components. This significantly reduces installation costs of the solar energy system.

The junction box concept is based on a flexible, open system structure, which allows serial as well as parallel interconnection via direct wire connect or separable connectors. Within the junction box up to six termination rails are available for photovoltaic foil connection.

The male and female cable couplers were designed for high voltage and high current-

carrying capacity in addition to the well-established IP 67 sealing requirement in the photovoltaic industry. Mating safety is provided by polarity keyed housings, fully shrouded contacts, reliable high cycle life, and squeeze to release connection system. In addition, a wide temperature range and fulfillment of worldwide standards for photovoltaic connection systems complement the robust product specification.

The design of the male and female receptacle for the junction box and the DC/AC converter follow the cable coupler "click philosophy" for quick and secure mating even in difficult mounting positions.

If required by the customer, the junction box can be delivered pre-configured with diodes, jumpers, plug connectors, and solar cable pigtauls.

Large Junction Box — Serial Interconnection

| SERIAL INTERCONNECTION | | | | | | | | | |

Solar Cable

Product Facts

- Dual wall insulation
- Electron beam cross-linked
- Excellent resistance to UV, water, ozone, fluids, salt, general weathering
- Excellent resistance to abrasion
- Halogen free, flame retardant, low toxicity
- Very low smoke emissions
- Excellent flexibility and stripping performance
- Wire size from 2.5 mm² up to 6.0 mm²

As part of expanding the SOLARLOK Product Line, Tyco Electronics has specified a wire that is designed to meet the harsh environmental conditions typical in the wiring of photovoltaic installations.

The flexible, dual wall, halogen free and cross linked solar wire offers long term stability and TÜV approval.

Its outstanding features include: high resistance against environmental conditions like humidity, UV-radiation and ozone.

In addition, it has excellent resistance to abrasion and temperature extremes.

The wire has a high dielectric withstanding voltage and with its fine-stranded, tin plated copper conductor, it is easy to handle and to strip.

Standards

Approval:

- IEC 60228 Class 5 (stranded tin plated copper and flexible);
- TÜV certified

Material and Finish

Conductor:

Stranded tin plated copper

Insulation:

Electron beam cross-linked Polyolefin

Sheath:

Electron beam cross-linked halogen free Polyolefin

Color:

Black, blue, red

Mechanical Features

Max. Conductor Temperature

Continuous: +110 °C

At Short Circuit: +250 °C

Min. Operating Temperature

Free Installation: -25 °C

Fixed Installation: -40 °C

Wire Size Range:

2.5 mm² (AWG 14),
4.0 mm² (AWG 12),
6.0 mm² (AWG 10)

Min. Bending Radius:

5 x cable wire diameter,
fixed installation

Electrical Features

Voltage Rating U₀/U:

1800/3000 V AC / 2600 V DC

Test Voltage for 5 Minutes:

6000 V

Max. Current Carrying Capacity (Free in Air):

36 A up to 116 A (size dependent)

Solar Cable, 1-Pole

Tyco Electronics Solar Cable, 1-Pole

Field Wiring, Switching and Protection

Product Features

- Modular product concept
- One-/two-pole switches
- Current up to 80 A DC
- Voltage up to 1000 VDC
- Compact, standardized design
- Proven quality

Switching

Collecting

Protecting

- One-/two-pole switch
- Main switch function
- Lockable
- Current up to 63 A DC
- Voltage up to 900 V Uoc

- 1 to 10 strings input
- Cable cross section up to 10 mm²
- SOLARLOK connectors
- Various cable glands
- Current up to 80 A DC
- Voltage up to 1000 V DC

- Lightning protection

Your Solution

The photovoltaic integrator looks for best fit solutions to wire various types and sizes of solar generators.

The new product concept from Tyco Electronics provides this flexibility to photovoltaic integrators.

The modular product can be comprised of a switch, lightning protection, fuses or any combination of these or other commonly available components.

We can customize a product to fit your specific application. Please contact us with your requirements.

SolKlip™ — Ground Clip

Product Features

- Self-tapping screw
- Quick and easy mounting
- Four-point contact to wire
- Low interface resistance
- Toolless termination
- Re-terminatable up to 5 times
- UV resistant
- Weather-proof
- UL approved
- RoHS compliant

Tyco Electronics' newest innovation provides the photovoltaic installers with a solution for grounding PV panels and mounting frames. The Tyco Electronics SolKlip brings a new ground connection solution to the market by utilizing well-known insulation displacement termination technology.

Existing solutions typically require the use of ring tongue crimp terminals which have to be crimped first at a specific location on the wire, a hole is then drilled into the mounting surface, and the product is finally mounted on the frame with a separate thread forming or self-tapping screw. The new Tyco Electronics SolKlip provides an extremely simplified solution for terminating a continuous-run ground wire.

Termination times are measured in seconds using the pre-mounted Tyco Electronics SolKlip thereby saving time and reducing wiring costs substantially. The four-point wire contact inherent in the design optimizes grounding performance and provides protection against contact problems due to its low interface resistance.

The Tyco Electronics SolKlip can be used with un-insulated copper wires from 12 AWG to 10 AWG. The retained-force nature of the contact provides a robust interface that minimizes vibration or thermally induced termination problems that often occur with traditional ground-screw connections. Termination of the wire is safely and easily accomplished toollessly by simply inserting the wire and closing the cover.

With a tensile strength of up to 36 kg, the UV-resistant enclosure provides a secure termination even in roughest environmental and assembly conditions. As an added benefit, the connection can be opened and re-terminated again up to five times.

Retrofitting the Tyco Electronics SolKlip on panels or frames can be done at any time by simply drilling a mounting hole in the frame and attaching the terminal to the frame using the integrated, self-tapping screw. This ensures a secure connection with the panel and/or frame.

The patent-pending Tyco Electronics SolKlip ground terminal supplements the existing Tyco Electronics SOLARLOK product portfolio and offers the electrician yet another valuable component for simple and fast wiring of a PV-system.

Description

SolKlip ground clips are designed for solar panel grounding applications using solid un-insulated copper 10 AWG and 12 AWG.

Applications

Solar panels and related products that require grounding for safety reasons. Applications include: wire jumpers between solar panels, solar roof tiles and between panels and the AC/DC inverters.

Electrical

The electrical performance of this product will meet the tough requirements of photovoltaic grounding applications.

Product Offering & Dimensions

SolKlip for Solar Grounding Part No. 1954381-1 to handle 12–10 AWG solid, un-insulated ground wire.

Application Tooling

No special tooling required.

Standards and Specifications

SolKlip Grounding Clip: UL 467 pending, a requirement for UL 1703 solar panel listing.
UL 486A-B pending, also a requirement as part of the UL 1703 approval listing.

Mechanical

The mechanical properties of this product will meet the tough requirements for grounding applications as specified in the UL requirements.

Materials

Housing:
Durable PPT

Contact:
High conductivity copper alloy

Interconnection Examples

Serial Interconnection for Junction Boxes with Cable Glands (4.0 mm² Wiring)

Note: All part numbers are RoHS compliant.

Interconnection Examples (Continued)

**Serial Interconnection for Junction Boxes with Plug Connectors
(4.0 mm² Wiring)**

Note: All part numbers are RoHS compliant.

Application Tooling (Continued)

Cable Assembly Tooling

Hand Crimping Tool
incl. Vario Crimp Head and Locator

Part Numbers

1-1579004-1 (1.5 + 2.5 mm²)
1-1579004-2 (4.0 + 6.0 mm²)

Vario Crimp Head

7-1579001-8 (1.5 + 2.5 mm²)
7-1579001-9 (4.0 + 6.0 mm²)

Extraction Tool
suitable for all wire sizes

Part No. **1102855-3**

Insulation Stripper

includes length stop for all wire sizes: 1.5 mm², 2.5 mm², 4.0 mm² and 6.0 mm².

Suitable for Tyco Electronics Solar Cable.

Part No. **4-1579002-2**

SOLARLOK Electric Terminator CS 200

Base Machine:
Part No. **539630-1**

Adapter for Vario Crimp Head:
Part No. **1579000-4**

Vario Crimp Head
(1.5 and 2.5 mm²):
Part No. **7-1579001-8**

Vario Crimp Head
(4.0 and 6.0 mm²):
Part No. **7-1579001-9**

Note: All part numbers are RoHS compliant.

**Junction Box
Assembly Tooling**

Application Tooling (Continued)

Wire Spring Clamp Tool

Part No. **1579007-2**

**Dioden/Jumper
Spring Clamp Tool**

Part No. **1579007-5**

Foil Spring Clamp Tool

Part No. **1579007-3** Large Box

Part No. **1740969-1** Medium Box

Part No. **1740969-2** Small Box

Field Service Kit

Part No. **1534858-1**
(Metric & AWG)

Kit includes the following parts:

- 100 Cable Coupler (Housings, Plus and Minus coded)
- Crimp Contacts (4.0 and 6.0 mm²)
- Strain Relief
- Seals
- **Hand Crimp Tool:**
Part No. **1-1579004-2**
- **Extraction Tool:**
Part No. **1102855-3**
- **Insulation Stripper:**
Part No. **4-1579002-2**

Note: All part numbers are RoHS compliant.

SOLARLOK Plug Connector

Attention: This connector is to be used only to interconnect firmly fixed cables.

Do not disconnect under load.

Current path should only be disconnected using approved disconnect devices.

Cable assemblies shall be labeled with Part No. **1394470-1**.

To protect against shock, ensure that conductors and their associated connectors are separated from opposite polarity components.

1. General Comments

Any kind of pollution (dust, humidity, etc.) during the assembly process can degrade contact and connector performance. This applies in particular to the seals and the crimping of the contacts. A clean assembly environment is therefore essential.

2. Termination of the Cable Wires and Crimping of the Contacts

SOLARLOK connectors use different crimp contacts for various wire gauges. Possible wire gauges are 1.5 mm², 2.5 mm², 4.0 mm², 5.3 mm² und 6.0 mm² resp. AWG 16, AWG 14, AWG 12 and AWG 10.

The tools to be used are selected based upon the wire gauge.
For the application specification, please refer to specification # 114-74013.

3. Handling of the Connectors

3.1 Selection of Sealing Grommet for Cable Connectors

Use only appropriate wire gauges.
Besides the standard seal/pinch ring combination further five different seals are available.

- 4.0 mm grommet inner diameter (for insulation diameter from 3.2 to 4.3 mm), Part No. **1394465-5**
- 5.0 mm grommet inner diameter (for insulation diameter from 4.3 to 5.3 mm), Part No. **1394465-1**
- 6.0 mm grommet inner diameter (for insulation diameter from 5.3 to 6.2 mm), Part No. **1394465-2**
- 7.0 mm grommet inner diameter (for insulation diameter from 6.2 to 7.2 mm), Part No. **1394465-3**
- 8.0 mm grommet inner diameter (for insulation diameter from 7.2 to 8.0 mm), Part No. **1394465-4**

The grommet has to be matched with the outer diameter of the solar cable (see customer drawing, Part No. **1394461** and Part No. **1394462**) and the pinch ring (Part No. **1418677-2**) must be applied.

Note: All part numbers are RoHS compliant.

Assembly and Installation Guidelines (Continued)

When assembling the connectors, the following sequence must be followed:

- ① Stripping the Wire (please refer to application specification # 114-74013)

Fig. 1

- ② Insert the stripped wire into the wire crimp barrel until it stops.
While holding the wire in place, squeeze tool handles together until ratchet releases.

Fig. 2

- ③ Place seal/pinch ring combination into the connector housing until it stops.

Fig. 3

- ④ Place backshell onto the connector housing.

Fig. 4

- ⑤ Push contact with cable into the connector housing until you hear the contact is locked into position

Fig. 5

- ⑥ Tighten backshell nut to 1.5 Nm

Fig. 6

Assembly and Installation Guidelines (Continued)

3.2 Connector Latching

When mating the SOLARLOK connectors, ensure the following:

- Connectors labeled with a plus or minus are keyed and can only be mated to similarly marked and keyed connectors.

CAUTION:

The “neutral” designated pin connectors incorporate no keying features and must only be used for Serial Interconnection of Photovoltaic Modules. The neutral product should not be used where maintaining polarity is critical.

The polarity of the “neutral” connector must be labeled with Part No. **1394725-1** or Part No. **1394725-2** nearby the connector.

- The connector system is fully latched only when the latches are flush with the mating connector.
- After the connector is fully latched, the optional latch locking clip may be snapped into place.

Fig. 7
(Female Connector)

3.3 Disconnecting

CAUTION: This connector must not be disconnected under load.

Disconnect circuit from load before unplugging connectors.

Cable assemblies should be labeled using Tyco Label, Part No. **1394470-1**.

Unmating of the connector

CAUTION: Do not disconnect the connector under load!

Fig. 8

① The locking mechanism is opened by depressing the latches.

② Pull out the connectors. While depressing the latches, disconnect the connector by pulling the connector halves apart.

Note: All part numbers are RoHS compliant.

Assembly and Installation Guidelines (Continued)

3.4 DC/AC Converter Receptacle

- ① Place a single wire seal onto the wire and strip wire (single wire seals are not available with every version).

Fig. 9

- ② Crimp the contact using the correct applicator for the wire gauge (# 114-74013)

Fig. 10

- ③ Place O-ring onto the connector housing; push in wire to stop until contact locks into the housing

Fig. 11

- ④ Push seal into the housing

Fig. 12

- ⑤ Assembly of the cover cap (not available with every version) and mounting in front panel

Fig. 13

- Required panel mount hole diameter: Diameter 12.5 mm.
- The panel thickness must not be under 1.0 mm.
- For environmental protection of the unmated connector, use of the covering cap is recommended.

Cover:

Part No. **1394739-1**

Note: All part numbers are RoHS compliant.

Assembly and Installation Guidelines (Continued)

4. Application Examples

Fig. 14: Serial (Wire Diagram)

Fig. 15: Parallel (Wire Diagram)

5. Storage

See Product Specification 108-18701

6. Tooling

- The following tools are available for the contact crimping (please specify wire gauge required):
 - Hand Tool, integral Locator and Die (Part No. **1-1105851-8**), use 'HVT' position on locator
 - Hand Tool, only (Part No. **539973-1**)
- An extraction tool (Part No. **1102855-3**) is needed to disassemble the connector components. This tool is used to unlock the contact retention features, after which the contact can be removed and re-used if necessary.
